

Real Booking & Payments Setup Guide

For Spacioudual.us — prepared by SLG Agency

What's changing

Right now, the “Reserva tu Sesión” button on your site is a demo — it doesn't actually charge a card or book a real appointment. We're replacing that with a real, working flow: a visitor picks an open time on your calendar and pays right there to confirm it. No separate steps, no manual back-and-forth.

We're doing this using two well-established, widely-used tools rather than building custom software for you to maintain: **Cal.com** for scheduling, and **Stripe** (which you already have an account with) for payment, connected directly to each other.

What it will cost

Both tools have free tiers that cover everything this project needs. There are no setup fees and no monthly minimums — the only real ongoing cost is the small percentage Stripe takes per payment, which is standard for any online card payment anywhere.

Item	Cost
Cal.com (single calendar/provider)	\$0/month
Cal.com (if you add additional providers, each with their own calendar)	\$12/user/month (billed yearly)
Stripe monthly/setup fee	\$0
Stripe per-booking fee (US cards)	2.9% + \$0.30 per transaction
Example: on a \$90 session	\$2.91 fee → you keep \$87.09
Site hosting (unchanged)	\$0/month

Note: cards issued outside the US add another 1.5%, and currency conversion adds 1% — only relevant if you expect bookings from international clients.

What we need you to do

These steps need your login and your business decisions, so we can't do them for you — but each one only takes a couple of minutes.

- 1 **Create a free Cal.com account** at cal.com, using the email you want appointment notifications to go to.

- 2 **Connect your calendar** (Google, Outlook, or iCloud) inside Cal.com, so your real availability shows up automatically and nothing gets double-booked.
- 3 **Connect your existing Stripe account** — in Cal.com, go to Apps, find “Stripe,” and click Connect. This is a standard secure login, not a new account.
- 4 **Create one appointment type** for your sessions — we’d suggest starting with “60 minutes / \$90” as a baseline, with payment required to confirm the booking. (You can absolutely adjust this price or length — just let us know what you’d like.)
- 5 **Add one required question** to that appointment type called “Servicio solicitado” so we know which of your 17 services someone is booking, since they’ll all share this one appointment type at first.
- 6 **Send us two things** once that’s done: your Cal.com username, and the appointment type’s link (it looks like cal.com/yourname/sesion-60-min).

What happens next

- We plug your Cal.com details into the site and connect the booking button on every service page.
- We run a test booking using Stripe’s test mode (no real charge) to confirm the whole flow works end to end.
- Once you’ve confirmed everything looks right, we push it live — typically within a couple of minutes of your approval.

Questions about any of this? Just reply and we’ll walk through it together.
